

Assignment 02 – Simple Number Processing
Due Friday, Jan 9th, 5pm.

Write a Java program that takes a variable number of numbers as input (that is, it should ask the user how many number to use & then read in that many numbers) and displays the largest, the smallest and the average. 5 pts.

Example:

```
How many numbers do you want to enter:  
5  
Enter numbers:  
2 -1 3 5 4  
Min: -1  
Max: 5  
Avg: 2.6
```

Place your **.java** file(s) into a **zip** file named:

CS225-A02-YourName.zip, where **YourName** is your actual name & upload the **.zip** to Moodle.
