

Blood donation worksheet
(Todt)

Name _____

Number _____

Date of donation _____

Location of donation: _____

Have you tried to give blood before ?

Yes or No

Is so, how many times?

Personal information (get answers while you are donating):

What was your temperature?

_____ F°

What was your blood pressure?

_____/____ mm Hg

Did the drop of blood from the “finger poke” sink quickly enough?

Yes or No

What were they measuring when they dropped your blood into that blue solution? _____

Even if you get to this point and you are not qualified to give blood, you still complete this form and get points for “going through the motions” and learning about blood donation.

Other Questions (Keep the informational handouts they give you):

How might your blood be used?

Do you think you might give blood again?

Yes or No

If you donate, your blood will be tested using NAT.

What does NAT stand for?

What diseases (organisms) are they looking for in the blood using NAT?

Why are they so concerned about who you have had sexual contact with and where you have traveled?
